DO YOU HAVE A TOOL OR A SYSTEM? HERE'S HOW TO TELL.

Most businesses mistake having Google Forms for having a system.

THE DIFFERENCE.

A TOOL

Works when you use it.

A SYSTEM

Works when you don't.

WHY IT MATTERS

TOOLS BREAK WHEN PEOPLE LEAVE. SYSTEMS KEEP RUNNING.

When the person who knew the spreadsheet leaves, the process leaves with them.

THE 3-PART TEST

01 Ownership

Every step has a named owner.

02 Enforcement

The process moves without reminders.

03 Visibility

Anyone can see status without asking.

01 OWNERSHIP

DOES SOMEONE OWN EVERY STEP, OR DOES IT DEPEND ON WHO'S AROUND?

If your process relies on specific individuals noticing something needs to be done, you don't have a system. You have a habit.

Example: supply requests texted to whichever lead is on shift.

02 ENFORCEMENT

DOES THE PROCESS ENFORCE ITSELF, OR DOES IT REQUIRE REMINDERS?

If a manager has to send an email, text someone, or walk the floor to make sure the process is being followed, that process is broken.

Example: a weekly email asking everyone to close their audit items.

03 VISIBILITY

CAN YOUR MANAGER SEE THE STATUS OF EVERY ACTIVE ITEM RIGHT NOW?

Without interrupting someone, checking an email thread, or finding an erased whiteboard. Real-time visibility is the hallmark of a system.

Example: the status board is a whiteboard someone has to walk to.

SAVE THIS FRAMEWORK. APPLY IT TO YOUR 3 MOST CRITICAL PROCESSES THIS WEEK.

Which of your "systems" would fail this test? Drop it in the comments.

Fails even one? AutoRise builds the system that passes all three. DM me for a free evaluation.
